

OFFICIAL CLIMATE REPORT

Urban Heat Island Prediction & Impact Analysis

Document Ref: HW-9721 | Date: 14/5/2026, 5:40:18 pm

Subject City: Panaji, India

Coordinates: 15.4785°N, 73.8339°E

32 / 100 — Low Risk

UHI Intensity: +0.11°C warmer than surrounding rural areas

Current Conditions

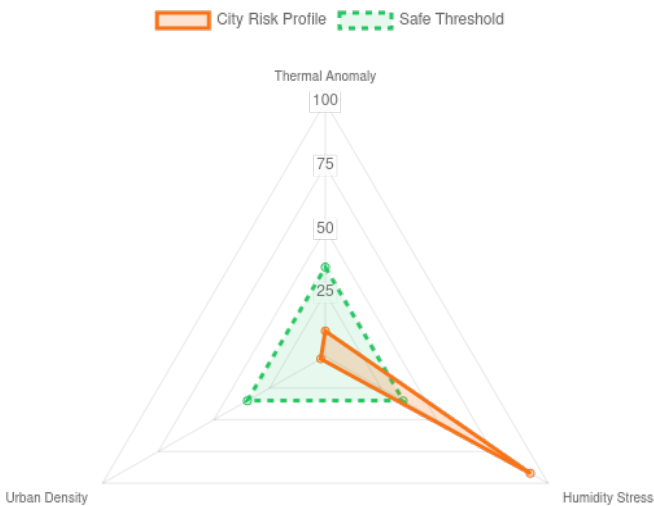

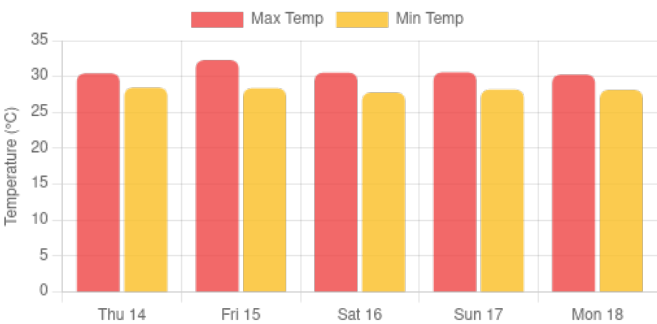

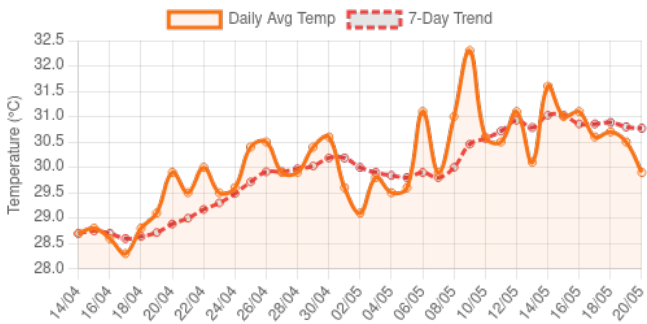

Temperature	Feels Like	Humidity	Wind Speed
31°C	38°C	74%	6.69 m/s

ML Model — Risk Factor Breakdown

Thermal Anomaly — Temperature deviation from 30-day mean		10/100
Humidity Stress — Heat amplification from atmospheric moisture		92/100
Urban Density Proxy — Estimated surface impermeability and density		2/100

Recommended Actions for City Planners

Historical Data & Forecast Analysis
